PROFILE SUMMARY

Full-stack developer (PERN) — 5+ years of experience. Proficient in TypeScript, Vue, React, and Tailwind CSS. Computer science and mathematics engineer. Bilingual in French and English. Independent, responsible, and a source of technical ideas. Motivated by new challenges.

RELEVANT COURSEWORK

■ Arithmetics	■ Algorithm	■ Web programming	■ OOP
■ Database management	■ Project management	■ Mobile programming	■ Probability & Stats

EXPERIENCE

Full-stack Developer [Sourcing Analyst] | Cargill West Africa Sep. 2021 – Now | Abidjan, Treichville

- Designed and led the development of a Kotlin mobile application enabling on-farm purchase of cocoa beans from partner cooperative producers, covering technical architecture, technology selection, team coordination, and production deployment.
- Designed and led the development of a web application for tracking cocoa beans by cooperative, built on SQL Server and ASP.NET.
- Designed and built dynamic dashboards for monitoring projects to improve farmers' incomes and the volume of cocoa beans purchased and delivered to the Cargill factory, in order to facilitate decision-making and optimize performance using **Power Bi, Power Query, DAX, SQL**, and **Power Automate**.

Software engineer - Student | Felix Houphouët-Boigny University June. 2022 – 2024 | Cocody, Abidjan

- Modeled and implemented a recipe RESTful API with **Symfony, Doctrine & Mysql**.
- Designed, developed and deployed a website for quoting contemporary authors and puzzle games, based on models and powered by RESTful APIs; built with **Vue.js, Tailwind & Symfony**.

PROJECTS

TraceXpert | ASP.NET, Kotlin, Bootstrap, JavaScript 2023 - 2024

- Implementation of a mobile application for purchasing cocoa beans directly from producers in the field, ensuring traceability. In parallel, implementation of a web application that allows cooperatives to access their data and manage their inventory more efficiently for improved activity monitoring.

Cocoa beans Delivery Tracker | DAX, Power BI, Power Query, Power Automate, SQL 2024 - 2025

- Design and development of a report tracking cocoa bean deliveries, connected to an SAP database to provide key indicators such as pending unloading volumes, analysis of purchased beans, total quantity acquired over a defined period, etc.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, HTML/CSS, Kotlin, DAX

Frameworks: Symfony, Node.js, Vue, React, Bootstrap, Tailwind CSS

Developer Tools: Git, Github, Webstorm, VS code, Slack, Insomnia, MS Office

EDUCATION

MIAGE | Felix Houphouët-Boigny University
Master's degree in Computer Science

Cocody, Abidjan
Sep. 2017 – June 2024
